- Seamless Integration

Training Instrumentation Systems

Senspex understands the importance of quality video for Exercise Control, Safety, and After Action Reviews at training sites. Our company offers leading edge network video technologies including thermal imaging, high-resolution megapixel, and specialized night vision cameras. We provide video management systems solutions with recording, archiving, and metadata search capabilities. Our team custom designs camera control systems and specializes in seamless integration of new equipment capability into legacy systems. Our video architecture allows viewing and operation from remote VIP or control sites. We manage everything from conception of the plan to implementation and sustainment of the system.
