Thermal Camera Repair

Senspex repairs thermal imaging camera and other advanced surveillance equipment. We have the capability to re-calibrate sensors, upgrade firmware, replace circuit boards, and perform optics and electronics repairs to cooled and un-cooled cameras. We work closely with leading manufacturers' engineering, service, and production personnel to ensure state-of-the-art system repairs.

Our experienced technicians are able to repair all major brands of thermal cameras with efficiency and affordability. All cameras and equipment are cared for with expert knowledge and technical skill. Senspex evaluates and repairs cameras and equipment so that customers receive their mission-critical products in working order in days instead of months. The quality control department inspects each shipment to ensure all cameras and equipment are packaged and shipped properly. Customer satisfaction is Senspex's top priority.
